This further supports our earlier analysis of COVID-19's effect on sales. In Q3 of FY 2020—comprising March, April, and May, when the pandemic was most severe—sales volumes fell to 2.1 million. Despite the pandemic's persistence, we began to recover quickly. This early rebound in Q4 is likely due to the increased demand for hardware like desktops and notebooks, as students transitioned to online learning, leading to a significant rise in the need for computer accessories.
